Review of Project AEMANNER SR/Lithuanian SSR

1. Production and Evaluation

AEMANNER produced four positive information reports which were disseminated during January, February, and April 1957. These included information on Soviet air and military installations, maneuvers, conscription, deportations, and kolkhoz economic and living conditions. Two disseminations were evaluated by Army. One concerning fortifications and air installations was rated of value. The other, containing information on the conscription of men under 40 years of age without prior notice, was considered by Army to have filled a priority need, and the continued receipt of information on this subject to be of special importance.

2. Rating of Production: C

3. Recommendation

Renewal is recommended.
